

PART OF THE MAYER-KUVERT-NETWORK GMBH

# UK ENVELOPE MANUFACTURERS

Established in 1986 we have grown to be one of the largest manufacturers and distributors of envelopes in the UK. We manufacture a wide range of different products to cater to your mailing needs. Whether you require plain envelopes for your mail or want to print your own artwork onto them, we have a broad range of window and non-window envelopes to suit most commercial applications.

We can help you to produce unique, eye-catching designs that will attract optimum response rates, tailor envelopes to suit your needs such as customised window sizes that can accommodate various details, and we can also keep it simple with printed designs being applied to our range of regular specifications.

- ✓ White PEFC certified and recycled manilla paper to suit most business applications – 80GSM to 115GSM as standard.
- ✓ Wallets (flap on long edge) and Pockets (flap on short edge).
- ✓ Inserting machine range including our unique Autoflat® design on selected sizes.
- ✓ Options of flap enclosure - Gummed, Self-Seal or Peel & Seal.
- ✓ Window or non-window.
- ✓ All white envelopes feature our unbranded security opaque as standard to avoid the contents from being read when sealed.

## European Network

The Mayer-Kuvert network is one of the largest groups of manufacturers, printers & distributors of envelopes in Europe.

- ✓ Spanning across over 14 countries including UK & Ireland
- ✓ Producing over 14 billion envelopes annually
- ✓ Over 40 sites throughout the network
- ✓ Over 2000 employees

The largest proportion of the envelopes we produce are printed for customer specific requirements, we have a wide range of print capabilities to meet the needs of customers.

From simple 1-colour designs to high quality 4-colour process images our capabilities allow us to help you decide the most effective and competitive format to achieve the quality you want.

- ✓ Simple 1 colour print
- ✓ Multiple spot colour printing
- ✓ 4 colour process (CMYK)
- ✓ Manufactured & printed in the UK

## Flexo Printing

Our comprehensive range of reel-fed envelope machines is the most efficient way to manufacture and print envelopes. It balances high-speed production with high quality flexographic printing and short, responsive lead-times.

- ✓ Up to 4 spot colours outside PLUS a printed security opaque on all sizes manufactured
- ✓ Flexo printing is the ideal and cost effective printing method for medium to high volumes

## Litho Overprinting

Lithographic printing is used for printing high quality and close register images. Litho overprinting jet-presses are capable of producing both simple 1 colour and complex 4 colour process images quickly and efficiently.

It is ideal for short and long runs that require the highest quality finish to your print. We can also convert pre-printed litho reels into finished envelopes offering customers a complete printing service.

- ✓ Litho Overprinting Presses
- ✓ Up to 5-colour printing
- ✓ Quick turnaround

## Pro-Flex

If you want close register, multi coloured, printed images featured in your design, then we can flexo most jobs by using our Pro-flex method.

This latest flexo technology attracts the benefits of cost-effective printing with complex images offering 4-colour process printed designs or total 100% coverage and solid colours showing depth and consistency across the entire surface.

- ✓ Close Register
- ✓ 4-colour Process Flexo
- ✓ Up to 8-colour
- ✓ Pro-Flex is ideal for medium-large volumes

**FTA** - Flexographic Technical Association:  
Excellence in Flexography Award Winners.

The installation of the W+D 628 machine at Heritage was a £2 million investment and the first of its kind in Europe.

Our newest machine brings a whole new layer to the conventional flexo process and is capable of faster running speeds allowing us to turn around jobs quicker than ever before. With multiple new printing capabilities, we can bring your images to life.

- ✓ 150LPI Print
- ✓ UV Colours
- ✓ Spot Varnishing
- ✓ Embossing
- ✓ Enhanced 4 colour flexo quality

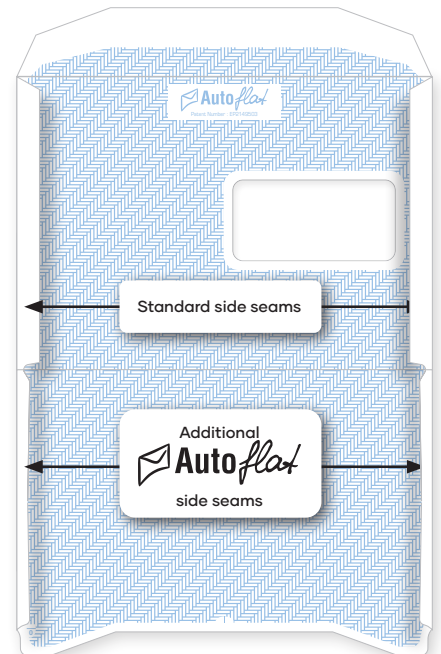

Autoflat® is designed specifically for optimising inserting machine efficiency.

**REDUCE** stoppages and machine **DOWNTIME**

**INCREASE** production **OUTPUT**

- ✓ **Double side seams**  
for added strength and security
- ✓ **Rigid side seams**  
reinforced to keep the envelopes flat for high speed insertion
- ✓ **Compatible**  
with the most popular inserting machines
- ✓ **PEFC certified paper**  
so you can be sure you are using paper from certified sustainable sources (FSC® (FSC-CO22608) available by request)
- ✓ **Patented technology**  
the first innovation in envelopes in decades
- ✓ **Regular 90gsm or NEW 80gsm**  
achieve maximum performance with 90gsm or 80gsm - in tests the 80gsm was equally efficient so you could reduce weight of the mail-piece AND reduce paper consumption meaning you reduce postage and your impact on the environment

## Avoid envelopes buckling when on the machine.

Autoflat envelopes are designed to stay straight for smooth, trouble-free inserting or printing to help you increase production efficiency.

600 ENVELOPES

1000 ENVELOPES

**Autoflat**

Patented Technology  
Patent Number : EP2149503

## Reduce environmental impact.

We have produced and packaged using our Packmail system **3.5 billion envelopes**.

- ✓ Reducing cardboard consumption and waste by 1100 tonnes
- ✓ Used 18,000 fewer pallets
- ✓ Reduced transportation by 700 lorry loads.

## Packmail, our patented technology.

Packmail is more compact, so you get more envelopes into the same space compared to a standard box. Reducing the amount of pallets you need saves on storage space, handling time and maximises vehicle space resulting in fewer journeys.

## Improve productivity on inserting machines.

The Packmail system, using our Autoflat envelopes, drastically improves productivity on inserting machines.

For every **1,000,000** envelopes you save:

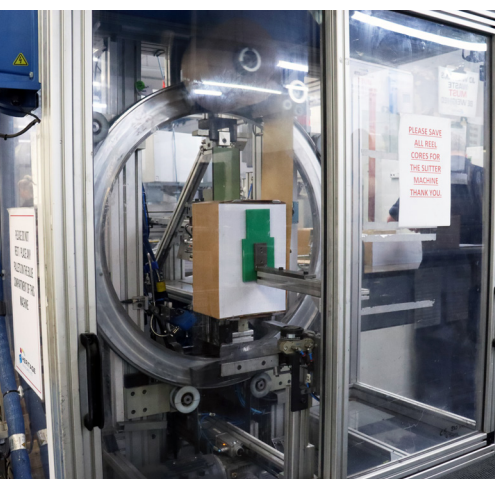

- ✓ **2000 cardboard boxes**
- ✓ **1/3 tonne of cardboard**

Take a look at our website [www.heritage-envelopes.co.uk](http://www.heritage-envelopes.co.uk) to watch our video and learn more about how you will benefit from Packmail.

**60% saving on  
cardboard waste**

**Reduction in  
transport costs**

**30% saving on  
storage space**

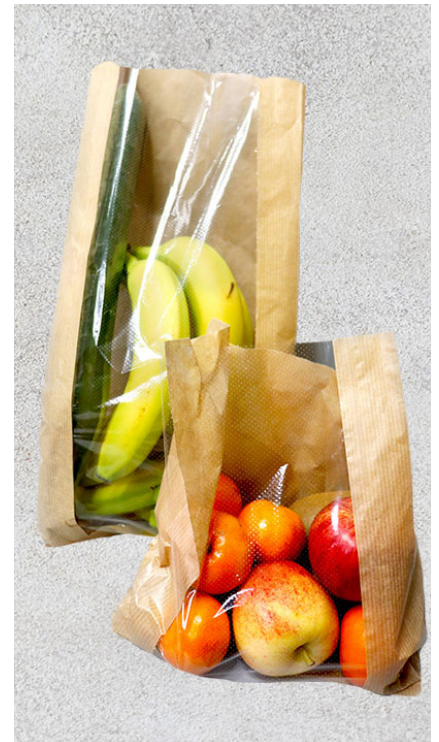

## Who We Are.

We have long championed the benefits of paper bags and packaging, not just for the environment but for your business needs, identity, and profit margins.

Paper is the medium of the future for light, flexible, and above all, sustainable packaging and shipping solutions.

We are currently working towards our long-term goal of becoming the UK's most sustainable paper bag manufacturers, with the aim of continuously advancing the topic of sustainability to leave as small an ecological footprint as possible.

## "Paper is the medium of the future"

## "Over 100 years of experience"

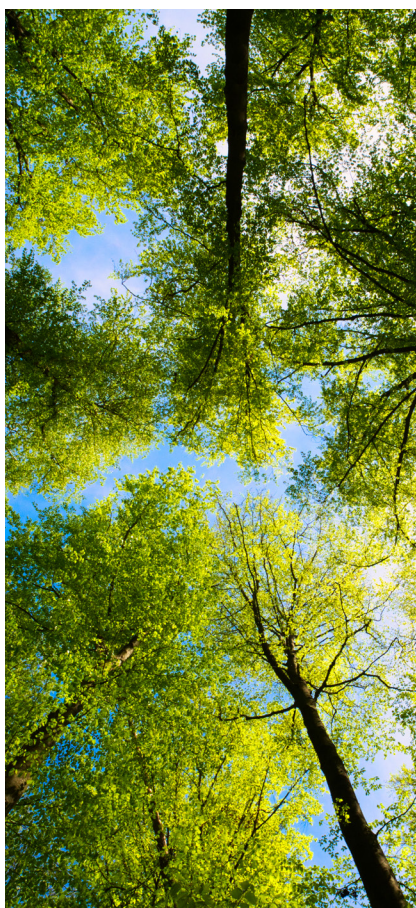

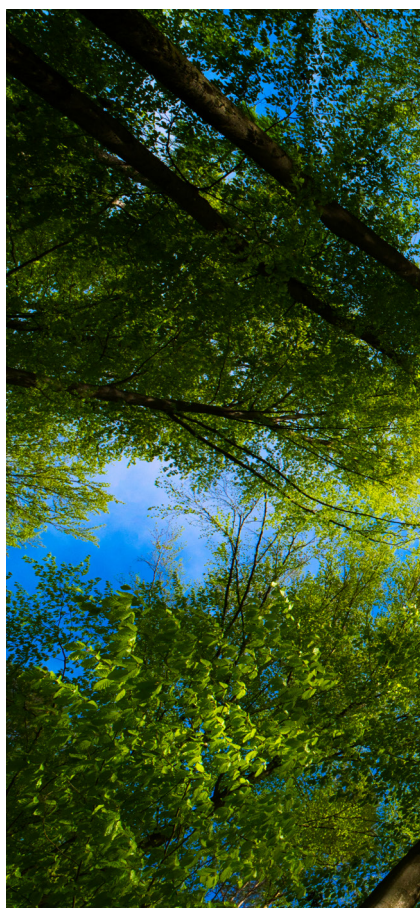

With over 100 years experience in paper packaging manufacturing, we supply a variety of paper bag products for e-commerce, postal, retail, and food use.

## Make an impact with **eco-friendly Paper Bags**.

Switch to Bestpac UK paper bags. Our paper bags are durable, reusable, and environmentally friendly – add your own logo for design or a personalised touch.

As proud PEFC and FSC® (FSC-CO22608) certified suppliers, we supply a rapidly expanding market who require high-quality, durable, and cost-effective paper packaging solutions.

## Certification & Environmental

Within just a few months of installation at the Blackburn plant, the team's hard work has been rewarded and recognised with food safety standards, BRCGS

\*BRCGS certification is for our paper food bags only.
